

College Chemistry Canada 2014 Webmaster's Report

Submitted by James Bailey

May 30, 2014

The C3 web pages have been updated on several occasions to include news of interest to C3 members, and posting of minutes of the monthly teleconference meeting. In addition the following have been completed or are in progress:

- Photos from the 2013 conference were uploaded and are available for viewing online.
- Information pages for the 2014 Conference in Vancouver were hosted on the C3 web pages while conference registration was handled by the CSC.
- The 2013 conference banquet registration and annual membership applications were hosted on the C3 website.
- The Paypal payment option has continued to be available for any transactions with C3. This use of this option has been increasing. For 2014, it has been used in almost 1/2 of all transactions.
- The Godaddy service and domain name registration expire on Mar 28, 2015. Renewal of the hosting service is due April 13, 2015.

Web Site Traffic Report for collegechemistrycanada.ca

Unfortunately the website traffic tracking provided by GoDaddy was discontinued in late 2013 without notification and data following the last download (May 2013) was discarded.

I have since installed some new tracking software and tracking data will be available going forward.
